Conference for the 10th Anniversary of the adoption of the European Landscape Convention in the Czech Republic

organised by the Ministry of the Environment,

in co-operation with the Ministries of the Regional Development, Agriculture, Culture, School, Youth and Sport

Lichtenstejnsky Palace, Praha, Czech Republic, 21 April 2015
Goals and principles of
the European Landscape Convention

Maguelonne DÉJEANT-PONS
Executive Secretary of
the European Landscape Convention / CDCPP
Council of Europe
maguelonne.dejeant-pons@coe.int
Council of Europe

Intergovernmental organisation founded in 1949

47 Member States- Headquarters in the Palais de l’Europe, Strasbourg

Statutes

- Promotes Democracy  Human rights  Rule of law

- Seek Common solutions to the main problems facing European society: spatial/regional planning (CEMAT) and landscape policies (ELC)
HUMAN RIGHTS
How should the concept of human rights be interpreted? In this 21st century, we must recognise that human rights as defined in the 1950s in the aftermath of the Second World War and as enshrined and set out in the European Convention on Human Rights and the European Social Charter must gradually open up to new concerns and take account of what may be called the “territorial and landscape dimension of human rights”.

While this concept clearly still needs to be explored and expanded, how could we fail to take account of the future of land and territory, an asset which we must pass on to future generations? How could we ignore the future of our natural and cultural heritage, which is absolutely invaluable but all too often is irreversibly threatened? We have a duty to consider these new rights, as well as new obligations and the responsibility we bear.

The European Landscape Convention refers to “rights and responsibilities for everyone”. It is a matter of jointly looking after the future of our landscapes for coming generations and considering how to protect, manage, develop and shape them, so to speak, in the best way possible.
DEMOCRACY
Public participation and involvement are keystones of spatial development. The support, involvement and will of the public are vital to conserving, managing or developing territories on a sustainable basis.

- European Regional/Spatial Planning Charter (1983): drew attention to the need for active public participation in the spatial planning process.

- Recommendation Rec.(2002) 1 of the Committee of Ministers to the Member States on the “Guiding Principles for Sustainable Spatial Development of the European Continent”: reiterated the importance of the effective participation of society in the spatial development process. Societal consensus is very important for the success of local and regional initiatives and also creates a dynamic environment for outside investors and economic players. The involvement of the younger generation in the planning process increase the chances of interesting the public in the long-term planning of their home region and in efficient and innovative participation.

- European Landscape Convention (2000): each Party undertakes to establish procedures for the participation of the general public, local and regional authorities, and other parties with an interest in the definition and implementation of the landscape policies.
THE RULE OF LAW
Council of Europe “Natural and Cultural Heritage and Landscape Conventions”

- Convention on the conservation of European Wildlife and Natural Habitats (Bern, 1979)
- Convention for the protection of the Architectural Heritage of Europe (Granada, 1985)
- European Convention on the protection of Archaeological Heritage (revised) (La Valetta, 1992)
- Council of Europe Framework Convention on the Value of Cultural Heritage for Society (Faro, 2005)
- European Landscape Convention (Florence, 2000): may be described as a “new-generation” treaty. It sets out areas of activity and the main thrusts of a programme of action providing the very basis for good governance and wise management of landscape
Spatial Planning and Landscape Recommendations of the Committee of Ministers to Council of Europe member states

Joint positions of Council of Europe Member states guiding spatial planning policies
- Recommendation (84) 2 of the Committee of Ministers to Member States on the European Regional/Spatial Planning Charter (based on the Charter adopted at the 6th CEMAT, Torremolinos, 2003)
- Recommendation (2002) 1 of the Committee of Ministers to Member States on the “Guiding Principles for Sustainable Spatial Development of the European Continent” (based on the “Guiding Principles” adopted at the 12th CEMAT, Hanover, 2000)
- Recommendation CM/Rec(2008)3 on the Guidelines for the implementation of the European Landscape Convention
COMMON SOLUTIONS
At their last Summit, Heads of State and Government of the Council of Europe expressed their commitment to “improving the quality of life for citizens”. In the section of the Action Plan on “Promoting sustainable development”, they agreed that, on the basis of the existing instruments, the Council of Europe would further develop and support integrated policies in the fields of environment, landscape and spatial planning, in a sustainable development perspective.

The European Regional/Spatial Planning Charter indicated that regional/spatial development “encourages improvement in the quality of everyday life, in respect of housing, work, culture, leisure or relationships within human communities, and the enhancement of the well-being of each individual through the creation of jobs and the provision of economic, social and cultural amenities which meet the aspirations of different sections of the population and which are sited in places where they will be used to the optimum.”

The European Landscape Convention also deals with individual and social well-being and people’s quality of life. Its preamble provides that “the landscape is an important part of the quality of life for people everywhere: in urban areas and in the countryside, in degraded areas as well as in areas of high quality, in areas recognised as being of outstanding beauty as well as everyday areas”.

The European Landscape Convention
Origins of the Convention

- Council of Europe work for rural landscape and cultural
- Mediterranean Landscape Charter of Sevilla
- Initial draft of the Congress of Local and Regional Authorities of the Council of Europe
- Decision of the Committee of Ministers to set up a select group of experts at governmental level responsible for drafting the Convention
- Adoption of the final text by the Committee of Ministers of the Council of Europe (Strasbourg, 19 July 2000)
- Opening of the Convention for signature (Florence, Italy, on 20 October 2000) in the context of the Council of Europe Campaign “Europe, a common heritage”
- Entrance into force of the Convention (1 March 2004)
- 2015…
Status of the Convention

- 19 July 2000, Strasbourg: Adoption of the Convention by the Committee of Ministers of the Council of Europe.
- 20 October 2000, Florence: the Convention was opened for signature in the context of the Council of Europe Campaign “Europe, a common heritage”.

Parties to the Convention: Andorra, Armenia, Azerbaijan, Belgium, Bosnia and Herzegovina, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Finland, France, Georgia, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Moldova, Montenegro, Netherlands, Norway, Poland, Portugal, Romania, San Marino, Serbia, Slovak Republic, Slovenia, Spain, Sweden, Switzerland, “the former Yugoslav Republic of Macedonia”, Turkey, Ukraine, United Kingdom (38 ratifications).

Signatories states: Iceland, Malta (2 signatures).

Other Council of Europe Member States: Albania, Austria, Estonia, Germany, Liechtenstein, Monaco, Russian Federation.
Why a Landscape Convention?

The developments in agriculture, forestry, industrial and mineral production techniques, together with the practices followed in town and country planning, transport, networks, tourism and recreation, and at a more general level, changes in the world economy, have in many cases accelerated the transformation of landscapes.

The Convention expresses a concern to achieve sustainable development based on a balanced and harmonious relationship between social needs, economic activity and the environment.

It aims to respond to the public’s wish to enjoy high quality landscapes.
Scope of the Convention

The Preamble says that States wish to provide “a new instrument devoted exclusively to the protection, management and planning of all landscapes in Europe”.

It applies to the entire territory of the Parties and covers natural, urban and peri-urban areas, whether on land, water or sea.

It concerns not just remarkable landscapes but also ordinary or everyday landscapes and degraded areas.

Landscape is recognised irrespective of its perceived value, since all forms of landscape are crucial to the quality of the citizens’ environment and deserve to be considered in landscape policies.
Philosophy

“The landscape...

... has an important public interest role in the cultural, ecological, environmental and social fields, and constitutes a resource favourable to economic activity and whose protection, management and planning can contribute to job creation;

... contributes to the formation of local cultures and ... is a basic component of the European natural and cultural heritage, contributing to human well-being and consolidation of the European identity;

... is an important part of the quality of life for people everywhere: in urban areas and in the countryside, in degraded areas as well as in areas of high quality, in areas recognised as being of outstanding beauty as well as everyday areas;

... is a key element of individual and social well-being and ... its protection, management and planning entail rights and responsibilities for everyone.

Preamble to the European Landscape Convention
Definitions

“Landscape” means an area, as perceived by people, whose character is the result of the action and interaction of natural and/or human factors.

“Landscape policy” means an expression by the competent public authorities of general principles, strategies and guidelines that permit the taking of specific measures aimed at the protection, management and planning of landscapes.

“Landscape quality objective” means, for a specific landscape, the formulation by the competent public authorities of the aspirations of the public with regard to the landscape features of their surroundings.

“Landscape protection” means action to conserve and maintain the significant or characteristic features of a landscape, justified by its heritage value derived from its natural configuration and/or from human activity.

“Landscape management” means action, from a perspective of sustainable development, to ensure the regular upkeep of a landscape, so as to guide and harmonise changes which are brought about by social, economic and environmental processes.

“Landscape planning” means strong forward-looking action to enhance, restore or create landscapes.
Aims of the Convention

To promote protection, management and planning of landscapes;

To organise European co-operation on landscape issues.
Council of Europe Working Programme

The work done to implement the European Landscape Convention is aimed at:
- Monitoring implementation of the Convention
- Promoting European and international co-operation
- Collecting examples of good practices
- Fostering knowledge and research
- Raising awareness
- Fostering access to information
1. Monitoring the implementation of the Convention

Council of Europe Conference of the on the European Landscape Convention
Council of Europe Steering Committee for Culture, Heritage and Landscape (CDCPP) – 8th Conference on 19-20 March 2015

Contracting Parties and Signatories States of the European Landscape Convention Member States of the Council of Europe

- Parliamentary Assembly
- Congress of Local and Regional Authorities of the Council of Europe
- Conference of international non governmental organisations with participative statute to the Council of Europe
- International governmental organisations
- International and national NGOs
National level: Contracting Parties undertake to implement four general measures

- Legal recognition of landscape as constituting an essential component of people’s surroundings, an expression of the diversity of their shared cultural and natural heritage, and a foundation of their identity;
- Establishment and implementation of landscape policies aimed at landscape protection, management and planning;
- Establishment of procedures for the participation of the general public, local and regional authorities and other parties with an interest in the definition and implementation of the landscape policies;
- Integration of landscape into regional and town planning policies and in cultural, environmental, agricultural, social and economic policies, as well as in any other policies, with possible direct or indirect impact on landscape.
National level: Contracting Parties undertake to implement five specific measures

- Awareness-raising: increasing awareness among the civil society, private organisations and public authorities of the value of landscapes, their role and changes to them

- Promotion in training and education:
  - training for specialists in landscape appraisal and landscape operations
  - multidisciplinary training programmes in landscape policy, protection, management and planning, for professionals in the private and public sector and for associations concerned
  - school and university courses which, in the relevant subject areas, address the values that the landscape has and the issues raised by its protection, management and planning

- Identification and evaluation: mobilising those concerned in order to reach a better knowledge of landscape, guiding the work of landscape identification and evaluation through exchanges of experience and methodology between the Parties at a European level

- Setting landscape quality objectives: defining landscape quality objectives for the landscapes identified and assessed, after public consultation

- Implementation of landscape policies: introducing policy instruments aimed at protecting, managing and/or planning the landscape
Recommendation of the Committee of Ministers of the Council of Europe

1) Recommendation CM/Rec(2013)4 of the Committee of Ministers to member States on the European Landscape Convention Information System of the Council of Europe: Recommends that States Parties to the Convention:

– use the Information System with its glossary, in the framework of their co-operation, and co-operate to develop it;
– continue to exchange information on all matters covered by the provisions of the Convention in order to promote knowledge of landscapes and landscape policies, in view of enhancing the quality of people’s lives, taking care of their surroundings.

The Information System will be a “toolbox” helping to provide mutual technical and scientific assistance through the collection and exchange of landscape experience and research, as provided for in Article 8 of the Convention on mutual assistance and exchange of information.
2) Recommendation CM/Rec(2008)3 of the Committee of Ministers to member states on the guidelines for the implementation of the European Landscape Convention

General principles are designed to provide guidance on some of the fundamental articles of the European Landscape Convention:

A. Consider the territory as a whole
B. Recognise the fundamental role of knowledge
C. Promote awareness
D. Define landscape strategies
E. Integrate the landscape dimension in territorial policies
F. Integrate landscape into sectoral policies
G. Make use of public participation
H. Achieve landscape quality objectives

“Every planning action or project should comply with landscape quality objectives. It should in particular improve landscape quality, or at least not bring about a decline. The effects of projects, whatever their scale, on landscape should therefore be evaluated and rules and instruments corresponding to those effects defined. Each planning action or project should not only match, but also be appropriate to the features of the places.”

I. Develop mutual assistance and exchange of information
Examples of instruments for landscape policies used to implement the European Landscape Convention (Appendix 1)

The purpose of this appendix is to provide some examples of instruments used to implement the European Landscape Convention. It can be supplemented by the experiences of parties to the convention on their own territories, which will provide useful lessons for improving the approach to landscape action.

Instruments are already being put to use in several countries and each of them can be a model for either the creation of new instruments or the improvement of existing ones.

Main categories of instruments:
– landscape planning: landscape study plans included in spatial planning
– inclusion of the landscape in sectoral policies and instruments
– shared charters, contracts, strategic plans
– impact and landscape studies
– evaluations of the effects of operations on landscape not subject to an impact study
– protected sites and landscapes
– relationship between landscape and regulations concerning the cultural and historic heritage
– resources and financing
  – landscape awards
  – landscape observatories, centres and institutes
  – reports on the state of the landscape and landscape policies
  – transfrontier landscapes
3) Recommendation CM/Rec(2014) 8 of the Committee of Ministers to member States on promoting landscape awareness through education

“Considering that one of the aims of education is to train young people and equip them with a set of skills necessary for citizenship and democracy;

Asserting that educational activities in the landscape field are an excellent way of giving meaning to the future;

Recommends that the governments of member States Parties to the Convention adopt legislative, regulatory, administrative, financial and other appropriate measures to initiate or to develop landscape education activities and to promote landscape awareness among the young in accordance with the principles set out in the appendix to this recommendation”.

… Pedagogical material for teachers in preparation
Suggested text for the practical implementation of the European Landscape Convention at national level for use as guidance for public authorities when implementing the European Landscape Convention (Appendix 2)

This guidance document suggests certain regulatory and institutional measures that could be taken at national level to assist in formulating, monitoring and evaluating landscape policies. Each paragraph is directly related to the corresponding provisions of the convention.

Paragraph 1 – Definitions / Paragraph 2 – Scope / Paragraph 3 – General principles

Paragraph 4 – Division of responsibilities and competences

... b. The Ministry of ...:

i. is responsible for implementing landscape policy and for interministerial co-ordination in that field;
ii. organises consultation with civil society and the assessment of landscape policies by an ad hoc body;
iii. in collaboration with the other ministries and with public participation, regularly develops and reviews a national landscape strategy laying down the guiding principles of landscape policy and describing the paths taken and the goals pursued in order to protect, manage or plan landscapes. This landscape strategy should be made public.

... c. The ministries whose activities influence landscapes should liaise with departments responsible for implementing landscape policy in the course of their activities, in keeping with the principles embodied in Paragraph 3, and regularly report on their landscape policy.

d. Regional and local authorities should have staff familiar with landscape issues who are capable of implementing landscape policy in their spheres of competence, taking landscapes into account at their respective territorial levels.
2. Promoting European and international co-operation

International measures

International policies and programmes
The Parties undertake to co-operate in the consideration of the landscape dimension in international policies and programmes, and to recommend, where relevant, the inclusion of landscape considerations in them.

The Parties undertake to co-operate in order to enhance the effectiveness of measures taken under other articles of the Convention, and in particular:
- to render each other technical and scientific assistance in landscape matters through the pooling and exchange of experience, and the results of research projects;
- to promote the exchange of landscape specialists for training and information purposes;
- to exchange information on all matters covered by the provisions of the Convention.

Transfrontier landscapes
Transfrontier landscapes are covered by a specific provision: the Parties shall encourage transfrontier co-operation on local and regional level and, wherever necessary, prepare and implement joint landscape programmes.

Council of Europe Landscape Award
Exchange experiences: the Council of Europe meetings of the workshops for the implementation of the European Landscape Convention

- Organised by the Council of Europe with a Member State of the Council of Europe and other partners on a regular basis since 2002
- Echange experiences, examining both good and bad practices in the protection, management and planning of the European landscape
- Special emphasis is given to the experiences of the state hosting the meeting.

Workshops 2002
23-24 May, Strasbourg, France

– Landscape policies: the contribution to the well-being of European citizens and to sustainable development – social, economic, cultural and ecological approaches
– Landscape identification, evaluation and quality objectives, using cultural and natural resources– Awareness-raising, training and education
– Innovative tools for the protection, management and planning of landscape
– Landscape Award
Workshops 27-28 November 2003, Strasbourg, France

– Integration of landscapes in international policies and programmes
– Transfrontier landscapes
– Individual and social well-being
– Spatial planning and landscape

Exhibition on “Landscape through the eyes of the children of Armenia”

Workshops 16-17 June 2005, Cork, Ireland

“Landscape for urban, suburban and peri-urban areas”
Workshops 11-12 May 2006, Ljubljana, Slovenia, “Landscape and society”

Workshops 28-29 September 2006, Girona, Spain, “Landscape quality objectives: from theory to practice”
Workshops 20-21 September 2007, Sibiu, Romania, “Landscape and rural heritage”

Workshops 25-26 April 2008, Piestany, Slovak Republic, “Landscape in planning policies and governance: towards integrated spatial management”
Workshops 8-9 October 2009, Malmo, Sweden, “Landscape and driving forces”

Swedish National Heritage Board

Workshops 15-16 April 2010, Cordoba, Spain, “Landscape and infrastructure for society”
Workshops 20-21 October 2011, Evora, Portugal, “Multifunctional landscapes”

Workshops 4-5 June 2012, Carbonia (Sardinia), Italy “Forum of national landscape selections for the Council of Europe Landscape Award”
Workshops 2-3 October 2012, Thessalonica (Greece), “Vision for the future of Europe on territorial democracy: Landscape as a new strategy for spatial planning. Another way to see the territory involving civil society…”

Workshops 2-3 October 2013, Montenegro, “The future of the territories, landscape identification and assessment: an exercise in democracy”
Workshops 11-12 June 2014, Wroclaw, Poland, 
“Forum of national landscape selections for the Council of Europe Landscape Award”

Workshops 1-2 October 2014, Urgup, Turkey, 
“Sustainable landscapes and economy: on the inestimable natural and human value of the landscape”
Workshops 1-2 October 2015, Andorra la Vella, Andorra
“Landscape and transfrontier cooperation, the landscape knows no boundary”

Workshops 1-2 October 2016, Erevan, Armenia
“National Landscape policies for the implementation of the European Landscape Convention”
National information Seminars and Events on the European Landscape Convention

– Information Seminar co-organised by the Council of Europe and the Republic of Armenia, Yerevan (Armenia), 23-24 October 2003

– Information Seminar organised by the Council of Europe, Moscow (Russia), 26-27 April 2004

– Information Seminar concerning sustainable spatial development and the European Landscape Convention co-organised by the Council of Europe and Romania, Tulcea (Romania), 6-7 May 2004

– Information Seminar co-organised by the Council of Europe and the Republic of Albania, Tirana (Albania), 15-16 December 2005

– Information Seminar on landscape in Andorra co-organised by the Council of Europe and the Principality of Andorra, Andorra la Vella (Andorra), 4-5 June 2007

3. Collecting examples of good practice: the Council of Europe Landscape Award Alliance

The Landscape Award recognise a policy implemented or measures taken by local and regional authorities or non-governmental organisations to protect, manage and/or plan their landscape which have proved effective in the long-term and can thus serve as an example to other territorial authorities in Europe.

The Award thus contributes to the stimulation of those working on a local level and to the encouragement and recognition of exemplary landscape management. It will be conferred by the Committee of Ministers, on proposals from the Committee of Experts responsible for monitoring the implementation of the Convention.

Criterion 1 – Sustainable territorial development
Criterion 2 – Exemplary value
Criterion 3 – Public participation
Criterion 4 – Awareness-raising

National actions
National implementation
Compendium of national data
Progresses achieved

– the landscape is progressively included in the political agenda of governments,
– an important network of cooperation at international level for the implementation of the European Landscape Convention has been developed,
– the concept of landscape, as defined by the Convention, is becoming more and more recognised in public policies at national, regional and local levels as well as by populations,
– new forms of cooperation are developed between different levels of authorities (national, regional and local) and between ministries or departments of one State or region,
– specific working structures for landscape (observatories, centers or landscape institutes) have been created,
– specific laws and regulations referring to landscape have been developed according to the provisions of the Convention,
– States or regions cooperate beyond their borders for transfrontier landscapes,
– national landscape awards referring to the European Landscape Convention have been launched,
– university programmes have been developed with a reference to the Convention and summer universities on landscape are organised,
– biennale landscape festivals and exhibitions are organised and films referring to the European Landscape Convention prepared.
Conclusions

The Council of Europe contributes to find solutions that will enable the society of tomorrow to live in an environment that gives scope for its full development.

Contemporary society throughout the world are confronted and will be brought increasingly to grips with phenomena and events that bring in question the values of their civilisation and ideals of their philosophies.

Urbanisation, concentration, competition, regional imbalance, unequal development, exaggerated population growth are the challenges that human being must recognise and overcome.
Spatial planning policy is an instrument in the hands of public authorities which use is a political responsibility. It should result in an organisation of space that expresses, in its distribution of human being and their activities, and in the quality of human environment created or adapted to our own time.

A thoroughly modern concept, landscape combines all four elements of sustainable development: natural, cultural, social and economic. It is also a constantly evolving story. A unique setting and meeting place for populations, landscape is a key factor in the physical, mental and spiritual well-being of individuals and societies.
A source of inspiration, it takes us on a journey, both individual and collective, through time, space and imagination.

Any government wishing to implement the principles of good governance needs to give due emphasis to landscape in its national and international policies.
